

## Compare and Contrast

Photosynthesis	and	(Aerobic) Respiration
with regards to:		

	who does it	
	Definition of process	
	When it occurs	
	Organelle where occurring	
	Why it is important	
	Steps involved in process	
	Chemical equation	

Use your text and the video to complete the table above. On the back of the paper, write a summary comparing and contrasting the cellular processes of photosynthesis and aerobic respiration.
